

Engineering and Laser Integrated Machining

Laser Integrated Machining (LASIB)

- Deep laser welding
- Laser clad welding for steel plating and corrosion control
- Research & Development of new products and patents
- Development of laser weldments for mechanical and machine components
- Integration of laser techniques into existing or new manufacturing processes
- Qualification of laser processes in accordance with customer specification
- Consulting

Your Advantage as LASIB Customer

LASIB is integrated into a competent network of companies and experts. This cooperation facilitates us to offer complete solutions for your products.

Our development and design department offers your production processes intelligent and cost effective solutions that are in line with state-of-the-art technologies.
